

Expert Session 1 – Workshop1
Commercialisation Roadmap
Perspectives and Gaps for Hydrogen Storage

Cost Reduction Perspectives
Fridolin Holdener, WEKA

STORHY
FINAL EVENT

June 3-4, 2008
Poissy, France

Cheaper Components!

STORHY

- **Higher numbers are most important**
- **Technology either for cryogenic as well as for high pressure gas or also for hybrid storage of H₂ is existing – however so far in small numbers only**
- **Challenge will be industrialisation from unique to series manufacturing**
- **Applications in high numbers are missing**
- **Maintenance requests experienced people due to the “new” or non-daily technology**
